Between the Rows

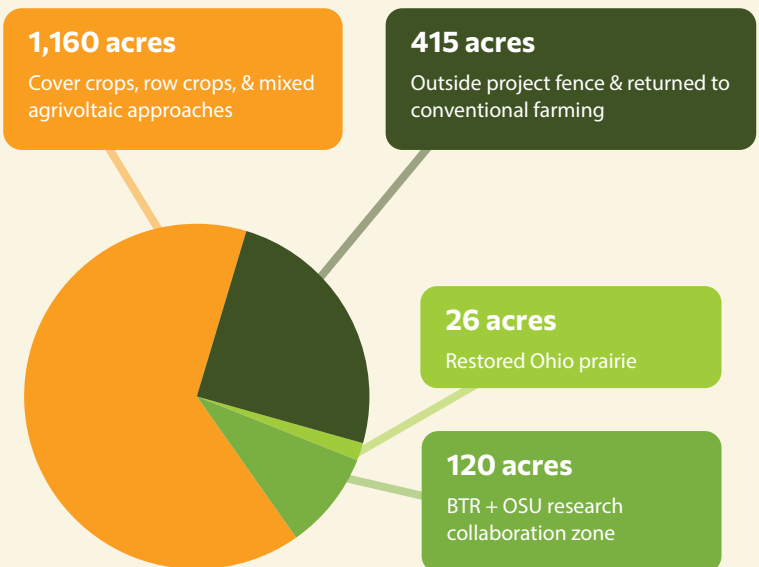

Madison Fields Solar Project + Ohio State University

Madison Fields Solar Project in Madison County, Ohio, is Savion's first operational utility-scale agrivoltaics site. Every step of the way, from construction through operations, the project team engaged in agricultural production on site, working with The Ohio State University College of Food, Agricultural, and Environmental Sciences since 2021 through the Between the Rows initiative.

This initiative is a testament to the power of collaboration and paves the way for innovations that create opportunities for farmers, as opposed to removing them.

Madison Fields Solar: Site Breakdown

Total project size is 1,696 acres
